Profile

Full-Stack Developer with a solid foundation in the **MERN stack** and a passion for building user-centric scalable web applications. Interested in leveraging academic knowledge and **hands-on project experience** to contribute to innovative software solutions in a dynamic organization.

Education

The Northcap University, BTech in Computer Science August 2020 – June 2024

- CGPA: 7.3/10.0

Rishi Public School, Secondary Education March 2018

Skills

- Technical: *Java, JavaScript, Nodejs, Express, React.js, MongoDB, Git, Rest APIs, Google Cloud Platform*
- Soft: *Communication, Emotional intelligence, Reliability, Teamwork*

Experience

Full Stack Developer, STABForge – Remote, December 2024- Present

- Developed a dynamic webinar registration system integrating React, Google Forms, Firestore, and Cloud Functions (Node.js, Firebase Gen 2), enabling real-time response syncing, increased system efficiency by 5 percent.
- Engineered secure backend automation to fetch and store Google Form responses using the Google Forms API, leveraging service accounts, improving response syncing by 10 percent.
- Debugged and resolved complex issues involving IAM roles, Cloud Run permissions, and Firebase routing using detailed log analysis and GCP Audit Logs.

Sr. PG Robotics, Front-end Developer, Moonpreneur Inc – Gurugram, Haryana May 2024 – Nov 2024

- Led hands-on robotics workshops, guiding students in building and programming projects using Arduino and Microbit, fostering STEM learning.
- Assisted students in troubleshooting robotics hardware and software issues, enhancing their problem-solving and debugging skills.
- Designed intuitive UI components and optimized website responsiveness using React.js and Tailwind CSS, ensuring a seamless user experience.
- Contributed to the startup's growth by supporting technical education initiatives while leveraging JavaScript, API integrations, and Git for web development.

Projects

E-commerce Marketplace, an E-commerce website that allows users to search for and place orders for products. [github-link](#)

- Features like Payment Gateway, Email Validation, API Authentication using JWT, MongoDB Atlas cloud database have been added to provide an end-to-end user handling experience.
- Tools Used: Node.js, React.js, Express, MongoDB and Rest API.

Intelligent Document Processing System, a web app for bank statements, invoices, automating data extraction. [github-link](#)

- The system extracts key details, generates Excel reports, and enables AI-driven document search.
- Tools Used: React.js, Node.js, Express.js, Multer, Google Cloud Document AI, Gemini AI, LangChain, Faiss,

Google TTS, ExcelJS
